Australian Mathematics Competition

AN ACTIVITY OF THE AUSTRALIAN MATHEMATICS TRUST

THURSDAY 5 AUGUST 2010

MIDDLE PRIMARY DIVISION COMPETITION PAPER

AUSTRALIAN SCHOOL YEARS 3 AND 4
TIME ALLOWED: 60 MINUTES

INSTRUCTIONS AND INFORMATION

GENERAL

- 1. Do not open the booklet until told to do so by your teacher.
- 2. You may use any teaching aids normally available in your classroom, such as MAB blocks, counters, currency, calculators, play money etc. You are allowed to work on scrap paper and teachers may explain the meaning of words in the paper.
- 3. Diagrams are NOT drawn to scale. They are intended only as aids.
- 4. There are 25 multiple-choice questions, each with 5 possible answers given and 5 questions that require a whole number answer between 0 and 999. The questions generally get harder as you work through the paper. There is no penalty for an incorrect response.
- 5. This is a competition not a test; do not expect to answer all questions. You are only competing against your own year in your own State or Region so different years doing the same paper are not compared.
- 6. Read the instructions on the **Answer Sheet** carefully. Ensure your name, school name and school year are filled in. It is your responsibility that the Answer Sheet is correctly coded.
- 7. When your teacher gives the signal, begin working on the problems.

THE ANSWER SHEET

- 1. Use only lead pencil.
- 2. Record your answers on the reverse of the Answer Sheet (not on the question paper) by FULLY colouring the circle matching your answer.
- 3. Your Answer Sheet will be read by a machine. The machine will see all markings even if they are in the wrong places, so please be careful not to doodle or write anything extra on the Answer Sheet. If you want to change an answer or remove any marks, use a plastic eraser and be sure to remove all marks and smudges.

INTEGRITY OF THE COMPETITION

The AMC reserves the right to re-examine students before deciding whether to grant official status to their score.

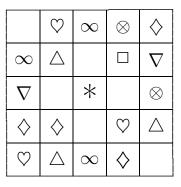

Middle Primary Division

Questions 1 to 10, 3 marks each

- 1. Which number is 1 + 10 + 100 + 1000?
 - (A) 1111
- (B) 11111
- (C) 1110
- (D) 1010
- (E) 10111
- 2. Which number is halfway between 600 and 700?
 - (A) 550
- (B) 645
- (C) 650
- (D) 655
- (E) 700

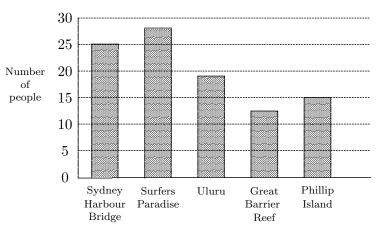

- 3. Greg starts at the square with the symbol * in it. He moves two squares up and one square to the right. Which symbol is in the square where he finishes?
 - $(A) \heartsuit$
- (B) ∞
- $(C) \otimes$

- (D) \triangle
- $(E) \square$

4. 100 people were asked to name their favourite place to visit in Australia. Their five favourite places were:

Favourite Places in Australia

How many more people voted for Sydney Harbour Bridge than for Phillip Island?

- (A) 40
- (B) 20
- (C) 10
- (D) 5
- (E) 7

- 5. A water tank has 56 L of water in it. If 28 L of water are added, how much water will be in the tank?
 - (A) 84 L
- (B) 56 L
- (C) 28 L
- (D) 76 L
- (E) 78 L
- **6.** What is one thousand and twenty-seven in numerals?
 - (A) 100 027
- (B) 10027
- (C) 1027
- (D) 127
- (E) 27
- 7. The following tally was made by a Year 4 class about the pets they had at home.

Pet	Tally
Dog	JHT
Cat	JHT JHT I
Bird	
Mouse	
Fish	

Which one of the following statements is correct?

- (A) There were more birds than fish.
- (B) There were more dogs than cats.
- (C) The class had 30 pets altogether.
- (D) The least popular pet was a bird.
- (E) The most popular pet was a cat.
- 8. The midpoints of the sides of a square are joined as shown. A part of the original square is shaded as shown. What fraction of the original square is shaded?

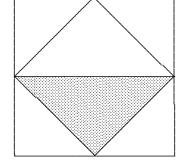

(B) $\frac{1}{6}$

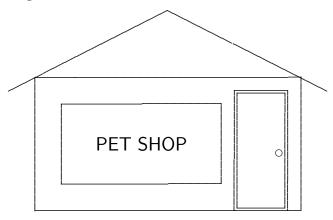

(C) $\frac{2}{3}$

(D) $\frac{1}{3}$

(E) $\frac{1}{5}$

- 9. What change should you receive from \$5 after buying three 55c stamps?
 - (A) \$1.65
- (B) \$2.35
- (C) \$2.45
- (D) \$3.35
- (E) \$3.45
- 10. Jillian is standing inside a pet shop and looking out the window shown in the diagram.

What does she see?

- (A) POHS T3P
- (B) POH2 TEP
- SHOP PET (D)

- **PET SHOP** (C)
- PET SHOP (3)

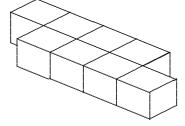

Questions 11 to 20, 4 marks each

- 11. I read my book from a quarter to ten until half past eleven. How long did I read for?
 - (A) 45 min

(B) $1.5 \, hr$

(C) 1 hr 45 min

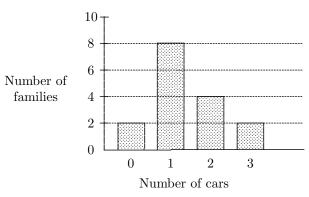

- (D) $2 \operatorname{hr} 15 \operatorname{min}$
- (E) 2 hr 45 min
- 12. Eight blocks are glued together as shown.

How many faces of these blocks are glued together?

- (A) 7
- (B) 8
- (C) 10
- (D) 12
- (E) 18

- 13. Mrs Conomos has 16 flowers. She wants to place the flowers in two vases so that one vase has three times as many flowers as the other. How many flowers will there be in the vase with the most flowers?
 - (A) 8
- (B) 10
- (C) 12
- (D) 14
- (E) 16
- 14. The number of cars in the family of each child in a class is recorded.

Which one of the following statements is true?

- (A) Two families have two cars each.
- (B) Six families have at least two cars each.
- (C) Four families have exactly one car each.
- (D) Every family has at least one car.
- (E) Three families have exactly two cars each.
- 15. This is Liam's timetable for a normal school day.

Time	Activity
$9:00 \mathrm{am} - 9:10 \mathrm{am}$	Morning assembly
$9:10 \mathrm{am} - 11:00 \mathrm{am}$	Class time
$11:00 \mathrm{am} - 11:30 \mathrm{am}$	Recess
$11:30 \mathrm{am} - 1:00 \mathrm{pm}$	Class time
$1:00 \mathrm{pm} - 1:50 \mathrm{pm}$	Lunchtime
$1:50 \mathrm{pm} - 3:00 \mathrm{pm}$	Class time
3:00 pm	Home time

How many minutes of class time does Liam have every day?

- (A) 300
- (B) 250
- (C) 500
- (D) 270
- (E) 240

16.	Which three Australian banknotes would you have if you had five of each and a total of \$400?					
	(A) \$5, \$10,	\$20	(B) \$5, \$10,	\$50	(C) \$5, \$1	10, \$100
		(D) \$5, \$20,	\$50	(E) \$10, \$2	20, \$50	
17.	Use the diag	gram to find	which of the	boxes is the	lightest.	
		a d		(d) (e) (e) (e) (e) (e) (e) (e) (e) (e) (e	7	
	(A) a	(B) b	(C) c	(D) d	(E) e
18.		has four pe	of a tuckshop	-		
	(A) 8	(B) 14	(C) 15	(D)	16	(E) 17
19.	fenceposts n		nceposts is 5 ld a fence arc m?			
	(A) 13	(B) 15	(C) 16	(D)	17	(E) 19

20. Harold wrote down his Personal Identification Number (PIN) but it got smudged and all he can see on his note is 35•2. He remembers that the PIN was divisible by 2 but not by 4. Which of the following could be the missing digit?

(A) 1

(B) 2

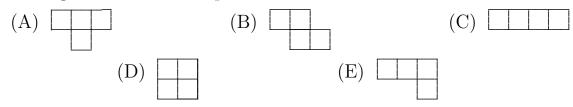

(C) 3

(D) 5

(E) 7

Questions 21 to 25, 5 marks each

21. Which of the following shapes cannot be used to fill completely a 4×4 grid with no overlap?

22. Jacqui starts from the year 2010 and counts down 7 at a time, giving the sequence 2010, 2003, 1996, 1989, A year that she will count is

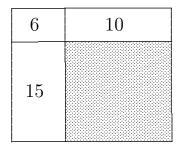

- (A) 1786
- (B) 1787
- (C) 1788
- (D) 1789
- (E) 1790

23. A rectangle is divided into four smaller rectangles with areas in square centimetres as shown in the diagram. The area, in square centimetres, of the shaded rectangle is

- (B) 25
- (C) 30

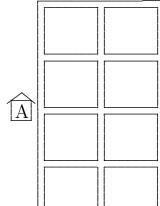

- (D) 31
- (E) 32

- **24.** Don went shopping to buy toilet paper. Which of the following gave the best value?
 - (A) 2 rolls for \$2.15
- (B) 1 roll for \$1.35
- (C) 4 rolls for \$4.20

- (D) 10 rolls for \$9.50
- (E) 12 rolls for \$11.95

25. Andrew lives in a house at point A on the map shown. Each section of road between two consecutive intersections is 1 km. Andrew often goes out for a 6 km run, but likes to vary his route, though without running any section of road twice. How many different routes can he take? (The same route in an opposite direction does not count as different.)

(A) 3

(B) 4

(C) 5

(D) 6

(E) 8

For questions 26 to 30, shade the answer as a whole number from 0 to 999 in the space provided on the answer sheet.

Question 26 is 6 marks, question 27 is 7 marks, question 28 is 8 marks, question 29 is 9 marks and question 30 is 10 marks.

- **26.** If all the numbers from 1 to 2010 are written down, how many of these will have two or more zeros next to each other?
- 27. Alex and his family plan to travel from Australia to England and then to France. They will need to change their money for each country. 100 Australian dollars converts to 40 English pounds, for England. 100 English pounds converts to 80 euros, for France.

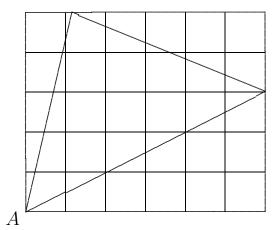

How many Australian dollars would be needed to get 120 euros?

- 28. Five rectangles, each 12 cm long and of equal width, are placed together to form a single rectangle, still 12 cm long but 5 times as wide. The new rectangle has a perimeter twice as great as each of the original rectangles. What is the perimeter, in centimetres, of the new rectangle?
- **29.** Consider this statement:

THIS IS ONE GREAT MATHS CHALLENGE

Every minute, the first letter of each word is moved to the other end of the word. In how many minutes will the original sentence appear back again?

30. Below is an example of a triangle drawn on a 6 by 5 grid with one vertex A on the bottom left-hand corner and the other two vertices on the top and right-hand boundaries.

What is the largest number of squares that can be cut by the sides of such a triangle?

A SELECTION OF AUSTRALIAN MATHEMATICS TRUST PUBLICATIONS

Indicate Quantity Required in Box
AUSTRALIAN MATHEMATICS COMPETITION BOOKS
2010 AMC SOLUTIONS AND STATISTICS PRIMARY VERSION – \$A37.00 EACH
This book is published each year for the Australian Mathematics Competition. It includes the questions full solutions, prize winners, statistics, information on Australian achievement rates, analyses of the statistics as well as discrimination and difficulty factors for each question. The 2010 book will be available early 2011.
AUSTRALIAN MATHEMATICS COMPETITION PRIMARY BOOK 1 2004–2008 – \$A52.50 EACH This book consists of the questions and full solutions from past AMC papers and is designed for use with students in Middle and Upper Primary. The questions are arranged in papers of 10 and are presented ready to be photocopied for classroom use.
BOOKS FOR FURTHER DEVELOPMENT OF MATHEMATICAL SKILLS
PROBLEMS TO SOLVE IN MIDDLE SCHOOL MATHEMATICS – \$A52.50 EACH
This collection of challenging problems is designed for use with students in Years 5 to 8. Each of the 65 problems is presented ready to be photocopied for classroom use. With each problem there are teacher's notes and fully worked solutions. Some problems have extension problems presented with the teacher's notes. The problems are arranged in topics (Number, Counting, Space and Number, Space, Measurement Time, Logic) and are roughly in order of difficulty within each topic.
TEACHING AND ASSESSING WORKING MATHEMATICALLY BOOKS 1 & 2 - \$A42.00 EACH
These books present ready-to-use materials that challenge students' understanding of mathematics. In exercises and short assessments, working mathematically is linked with curriculum content and problem-solving strategies. The books contain complete solutions and are suitable for mathematically able students in Years 3 to 4 (Book 1) and Years 5 to 8 (Book 2).
The above prices are current to 31 December 2010.
Online ordering and details of other AMT publications are available on the Australian Mathematics Trust's web site www.amt.edu.au
PAYMENT DETAILS Payment must accompany orders. Please allow up to 14 days for delivery. Please forward publications to: (print clearly) Name: Address:
Country: Postcode:
POSTAGE AND HANDLING - within Australia, add \$A4.00 for the first book and \$A2.00 for each additional book - outside Australia, add \$A13.00 for the first book and \$A5.00 for each additional book
Cheque/Bankdraft enclosed for the amount of \$A
Please charge my Credit Card (Visa, Mastercard) Amount authorised:\$A Date: / /
Cardholder's Name (as shown on card):
Cardholder's Signature: Tel (bh):
Card Number: Expiry Date: /
All payments (cheques/bankdrafts, etc.) must be in Australian currency
payable to AUSTRALIAN MATHEMATICS TRUST and sent to: Australian Mathematics Trust, University of Canberra ACT 2601, Australia.
