

Cambridge Lower Secondary Progression Test

Mathematics paper 1

Stage 7

55 minutes

Name

Additional materials: Geometrical instruments
Tracing paper (optional)

READ THESE INSTRUCTIONS FIRST

Answer **all** questions in the spaces provided on the question paper.

Calculators are **not** allowed.

You should show all your working on the question paper.

The number of marks is given in brackets [] at the end of each question or part question.

The total number of marks for this paper is 45.

- 1 Safia asks 30 boys and 30 girls how they travel to school.
The bar chart shows her results.

- (a) Write down the modal method of transport for boys.

..... [1]

- (b) Tick (✓) to show whether each of these statements is true or false.

	True	False
12 girls walk to school.	<input type="checkbox"/>	<input type="checkbox"/>
More girls than boys travel to school by car.	<input type="checkbox"/>	<input type="checkbox"/>
The same number of boys and girls travel to school by bus.	<input type="checkbox"/>	<input type="checkbox"/>
For all 60 students the least common method of transport is bicycle.	<input type="checkbox"/>	<input type="checkbox"/>

[2]

- 2 Two of the values in this list are equal to $\frac{1}{4}$

Draw a ring around each one.

1.4 0.4 25% 40% 0.25 4%

[1]

- 3 (a) Work out 2.05×1000

..... [1]

(b) Write the missing number in the box.

$$4.6 \div \boxed{} = 0.046$$

[1]

- 4 Calculate $3 - (5 - 4) + 2 \times 4$

..... [1]

- 5 Complete the boxes to show equivalent fractions.

$$\frac{3}{5} = \frac{\boxed{}}{10} = \frac{9}{\boxed{}}$$

[1]

- 6 Work out 15% of \$700

\$..... [1]

- 7 Pierre has a chocolate bar with a mass of 80 g.
He eats $\frac{1}{5}$ of the bar.

Work out the mass of the chocolate that is left.

..... g [1]

- 8 Write the missing digits in the boxes to make this statement correct.

One quarter of

	2
--	---

 is

1	
---	--

[1]

- 9 The diagram shows a shape drawn on a square grid.

Draw the reflection of the shape in the mirror line.

[1]

10 Draw a ring around each number that divides exactly into 120

3 8 9 10 100

[1]

11 The diagram shows angle a .

(a) Tick (✓) the correct description of angle a .

Acute

Right

Obtuse

Reflex

[1]

(b) Measure accurately the size of angle a .

$a = \dots\dots\dots^\circ$ [1]

12 Work out.

(a) 0.9×3

..... [1]

(b) $9 - 3.24$

..... [1]

13 Angelique is making a sequence of patterns using cubes.

Pattern 1
6 cubes

Pattern 2
10 cubes

Pattern 3
14 cubes

(a) Work out the number of cubes needed for Pattern 4

..... [1]

(b) Write a number to complete this description of Angelique's patterns.

The number of cubes is always more than a multiple of 4 [1]

(c) Work out the number of cubes needed for Pattern 100

..... [1]

14 The table shows the midday temperature, in °C, for one week.

Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
-3	0	4	-1	-2	2	

(a) The temperature on Sunday was 3 °C colder than on Saturday.

Complete the table.

[1]

(b) Write down the difference between the temperatures on Monday and Wednesday.

..... °C [1]

(c) At midday on Friday the temperature was -2 °C.
Later on the temperature was 3 °C.

Find the increase in temperature.

..... °C [1]

15 Work out.

$$\frac{8}{9} - \frac{2}{3}$$

..... [2]

16 The table shows the number of men, women and children watching a film at a cinema.

Men	Women	Children
8	18	24

(a) Work out the percentage of the people that are women.

.....% [2]

(b) Write the ratio of men to children in its simplest form.

..... [2]

17 Work out.

$$143 \div 20$$

..... [1]

18 Complete the following.

$$0.094 \text{ km} = \dots\dots\dots \text{ m}$$

$$1255 \text{ ml} = \dots\dots\dots \text{ l}$$

$$\dots\dots\dots \text{ tonnes} = 465 \text{ kg}$$

[2]

- 19 Write 0.225 as a fraction.
Give your answer in its simplest form.

..... [2]

- 20 Two squares are put together to make a rectangle.

NOT TO SCALE

The sides of each square are h mm long.
The perimeter of the rectangle is P mm.

- (a) Explain why $P = 6h$

.....
..... [1]

- (b) Work out the value of h when P is 120

$h =$ [1]

- 21 (a) A bag contains 11 green apples and 9 red apples.
Mike picks an apple out of the bag at random.

Write down the probability that he picks a red apple.

..... [1]

- (b) Mia also has some red and green apples in a different bag.
The probability that she picks out a red apple is $\frac{7}{10}$

Write down possible values for the number of red and green apples in Mia's bag.

..... red apples and green apples [1]

- 22 Complete these calculations.

(a) $35 \times 17 = 17 \times 5 \times \dots\dots\dots$ [1]

(b) $86 \times 19 = (86 \times \dots\dots\dots) - (86 \times 1)$ [1]

- 23 Write the fraction $\frac{143}{55}$ as a mixed number in its simplest form.

..... [2]

- 24 Jamila has a rectangular piece of garden measuring 1 m by 1.5 m.
She wants to cover it with square slabs that are 0.5 m along each side.
One slab costs \$2.35

Work out the total cost of the slabs for this piece of garden.
